# Seabrook (2550 ft<sup>2</sup>)

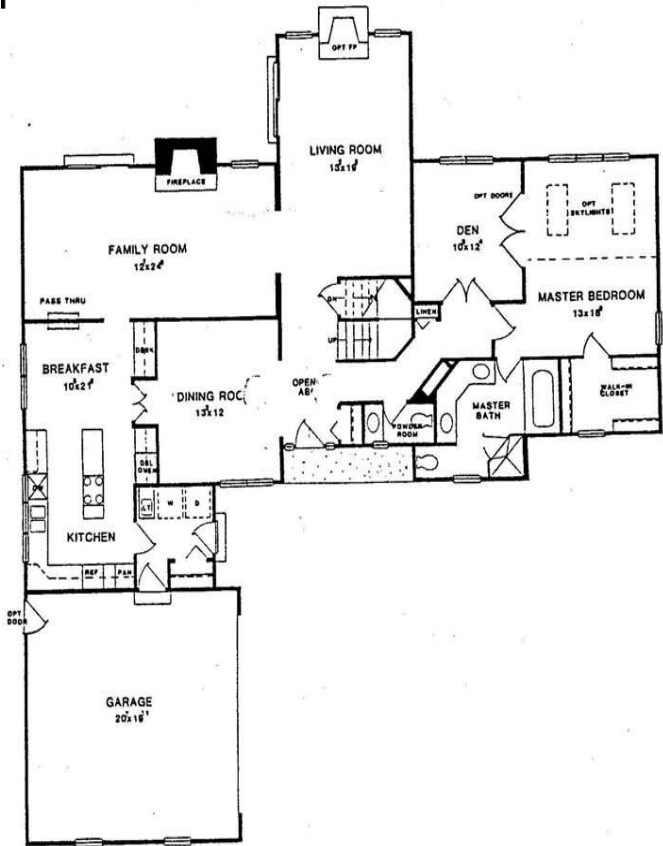

The Seabrook model combines the better qualities of both ranch and two story single family living. The main floor offers a living room (some with a fireplace), a separate formal dining room and a family room with fireplace. The living and dining rooms are ideal for formal occasions while the family room invites more casual day-to-day living. The kitchen breakfast nook conveniently opens into both the dining room and the family room. The design of the Seabrook assures the privacy of the owners by locating the master bedroom and master bath on the main floor of the home. The master suite, while offering the stair-saving conveniences of a ranch, is strategically located away from the more active parts of the home. It is further secluded by the careful placement of a den between it and the family room.

A functional yet aesthetic winding staircase reaches the upstairs of the Seabrook. The top of the stairs overlooks the dramatic two-story entry foyer. Once upstairs in the Seabrook one finds three more bedrooms and a full second bath. These rooms will easily accommodate a growing family or offer overnight quests welcomed privacy. A main floor laundry room, two car garage and large basement complete the design.
